

THE TREATMENT

- Block the formation of DHT within hair follicles
- Re-anchor the hair follicle with its roots
- Replenish micro-circulation that brings oxygen and nutrients to the roots
- Supply all the nutrients, vitamins and proteins required for healthy hair function

FREQUENTLY ASKED QUESTIONS

How does the Dermaroller® Hair & Scalp treatment work?

During the Hair & Scalp treatment, a professional micro-needling machine (eDermaStamp® by Dermaroller®) infuses therapeutic ingredients into the scalp. These ingredients rejuvenate the hair follicles, block DHT and help the hair grow thicker and healthier.

How many treatments do I need?

You will need 8 consecutive treatments for optimal results.

When will I start to see results?

Results are individual and can vary between people. Generally, the results are most visible 2-3 months after the 8th treatment. For many people, noticeable improvement can be seen during the course of treatment.

How can I maintain my results?

To complete the professional treatment and maintain results, you will be provided with a bottle of Hair Lotion to apply at home. The lotion protects the recovering follicles and nourishes the scalp. To maximize the efficacy of the Hair Lotion, it's recommended to gently needle the scalp with Dermaroller® Home Care Roller every other night before application.

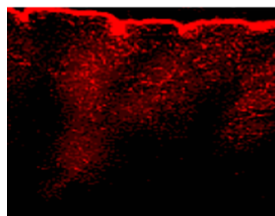

TREATMENT BENEFITS

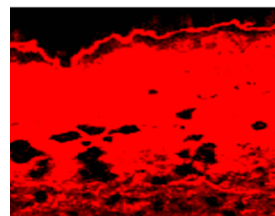

- Strengthens hair roots
- Maintains function and structure of scalp skin tissue
- Repairs damaged follicles
- Ensures optimal anchorage of the hair roots
- Increases thickness and density

MAXIMUM ABSORPTION

The active ingredients go beyond the surface of the scalp and penetrate deeper into the skin. The treatment creates thousands of micro-channels in the scalp, which significantly increases the absorption of active ingredients, ensuring maximum treatment efficacy.

Without Dermaroller® - limited absorption of active ingredients

With Dermaroller® - significant absorption of active ingredients

NATURAL, POWERFUL ACTIVE INGREDIENTS

B-Vitamin Complex

The best vitamin group for hair loss. B vitamins stimulate blood supply to the roots and increase the activity of cells around the scalp

Biotin

Derived from grains and nuts, biotin is known to boost the production of keratin - the protein of which hair is made of

Amino-Acid Complex

The building blocks of keratin and other proteins that support healthy hair growth

Caffeine

Powerful antioxidant, stimulates blood supply to the roots and blocks DHT

Copper Peptide

Powerful DHT blocker with anti-inflammatory benefits

Corn Seed Extract

Improves blood flow to hair follicles. It is a natural emollient that moisturizes the scalp and hair by keeping the hair follicles hydrated and well nourished

Grape Seed Oil

Rich with Vitamin E and Linoleic Acid, which hydrates the scalp and stimulates hair growth

Ginseng Extract

Anchors the roots of hair follicles to the scalp and prevents hair thinning

Hyaluronic Acid

Enriches the scalp with moisture and keeps the follicles well-hydrated. Hyaluronic acid is also known as a natural antioxidant

Rosemary Oil

Rosemary essential oil is known for its ability to improve cellular generation and blood circulation in hair follicles

Sage Oil

Clary sage essential oil helps balance scalp oils and increases cellular metabolism

Saw Palmetto Berry Extract

One of the best known natural ingredients to block DHTs

Vitamin C

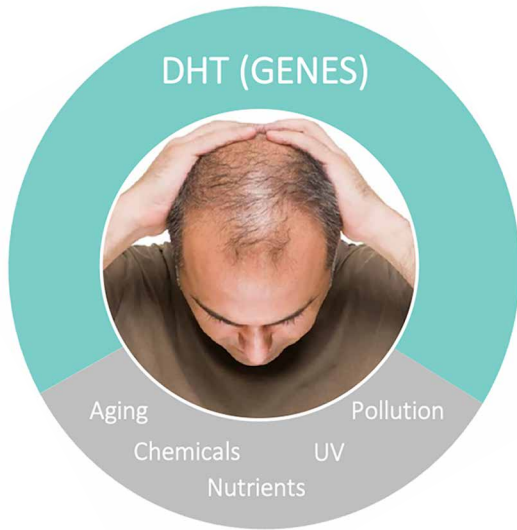

Powerful antioxidant which also helps to create collagen - an important part of hair structure

SCIENCE OF HAIR LOSS

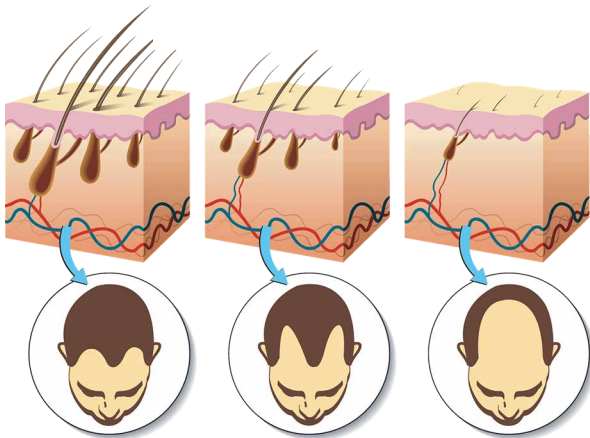

Hair loss is a widely common condition which affects both men and women. In the U.S and Canada, about 60% of men and up to 40% of women are affected by hair loss.

WHY DO WE LOSE HAIR?

The #1 factor of hair loss in women and men is a hormone called DHT. The level of DHT in the follicles is determined by genes.
